

FASTENER FAMILIES

Corrosion Resistant

Colour Matched Aesthetic

Neat Surface Finish

Fast and Easy Installation

No Pre-drilling Required

FUN FACT

Certain stainless steels are magnetic. Like most of the 400 series stainless steel you will find in our clips and stainless steel metal deck fasteners.

METAL TRIM SCREW

For fastening 10-18 mm thick composite fascia boards onto metal frames without having to pre-drill. Unless specified by decking manufacturer. Suitable for deck boards onto metal frames of up to 2.0mm without having to pre-drill, thereafter it is advisable to pre-drill. Detachable reamer wing is only operational in steel upward of 1.2 mm thick. For a tight grip ensure that the wing has broken off.

DECK FASTENERS

HIDDEN DECK CLIPS S6 CLIP S9 CLIP

For fastening grooved deck boards with a foot height of approximately 6.0 mm. For fastening grooved deck boards with a foot height of approximately 9.0 mm.

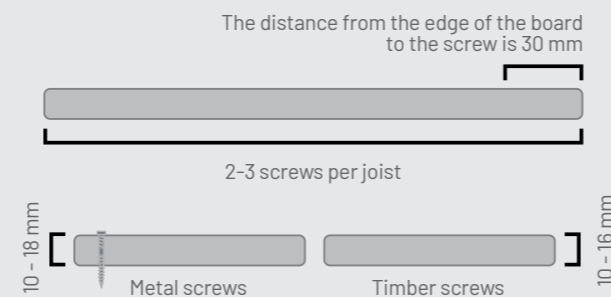

UNIVERSAL COLLATED CLIPS **NEW**

Universal collated clips with preloaded screws. Available in both metal and timber screws. Suitable for deck boards of various groove depths from 6.0mm to 12.0 mm, as well as substrates. This universal clip allows for quick and easy installation using a custom designed hand tool. No need for pre-drilling, unless specified by the deck manufacturer.

FASCIA FASTENERS

TIMBER CLIP SCREW

For fastening HULK Hidden deck clips onto timber frames without having to pre-drill. Unless specified by decking manufacturer. Suitable for softwoods and most hardwood frames. Pre-drilling may be required in denser hardwood timbers. Stainless steel - SS316. Epoxy coated dark brown or black.

COMPATIBLE WITH 'S' SERIES CLIP AND COLLATED CLIP

TIMBER DECK SCREW

Used for fastening 20 - 25 mm thick composite deck boards onto timber frames without having to pre-drill unless specified by decking manufacturer. Suitable for softwood and most hardwood's frames. Pre-drilling may be required for dense hardwood frames.

TIMBER FRAMING SCREW

For fastening hardwood and softwood timber in a single or double level frame application. Pan head has a built in washer.

TIMBER TRIM SCREW

Designed to fasten a 10 to 16 mm thick fascia boards onto timber frames without having to pre-drill, unless otherwise specified by decking manufacturer. Thereafter it is advisable to pre-drill the composite only. Suitable for softwoods and most hardwoods. Use two or more screws per fastening line 30 mm from the edge of boards at appropriate spans. In accordance with trim manufacturers guidelines.
